

NVIS DAY April 25th 2026

NVIS Day is an opportunity to setup and test antennas in a Near Vertical Incidence Skywave (NVIS) configuration. Can we communicate with amateur radio stations that are within a 0 to 500 mile radius on the 40m and 80m amateur radio bands? NVIS DAY officially starts at 10am and ends at 4pm. We will setup antennas to test and fire up the grill for lunch. Dress for the weather, bring a folding chair, side dish to share for lunch and optionally an antenna to test. Official NVIS day info visit <https://arrl-ohio.org/nvis/>
